EDUCATION

University of Houston – Clear Lake

Master of Science in Computer Science – GPA: 3.35 / 4.0

Aug 2024 – May 2026

Houston, TX

Silver Oak University

Bachelor of Engineering in Computer Science / Information Technology – GPA: 3.84 / 4.0

Aug 2020 – May 2024

Gujarat, India

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, TypeScript, SQL, Swift, HTML5, CSS3

AI & LLM: Gemini API, Claude Code, Cursor, RAG, Multi-Agent Orchestration, Prompt Engineering, Vector Databases

Backend & APIs: .NET 10, EF Core, Node.js, Express.js, REST API, Socket.IO, JWT Auth, Webhooks, MVC, OOP

Frontend & Mobile: React 19, React Native, Redux, Zustand, Vite, Tailwind CSS, SwiftUI, Xcode

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Cloud & Tools: AWS (S3, EC2, SQS), Google Cloud, Docker, Kubernetes, CI/CD, Git, GitHub, Azure DevOps, Postman, Figma

Testing & Practices: Unit Testing, QA, Agile/Scrum, RESTful Design, SEO Optimization

EXPERIENCE

Software Developer

Bigblue Technologies

Sep 2026 – Present

Remote – Costa Mesa, CA

- Converting the company's production iOS app into an Android app with React Native and Firebase, translating native screens, navigation, and business logic into a cross-platform codebase to reach Android users.
- Accelerating the migration with AI-assisted development in Claude Code, mapping SwiftUI components to React Native and reviewing every AI-generated change; working directly with the founder on weekly priorities.

Software Engineer

Jan 2026 – May 2026

- Resolved critical production bugs across a 10,000-line SwiftUI iOS codebase in Xcode, restoring a stable experience for 200 early adopters; all fixes were reviewed and merged by the technical founder.
- Hardened the product MVP by building QA and unit-test coverage that caught regressions before release, achieving zero post-launch regressions across 3 release cycles.
- Rebuilt the company's marketing site (thebigblue.app) from scratch - 5,000+ lines of production-ready code - lifting the Lighthouse score from 60% to 95%, improving Google ranking and organic user acquisition.

Software Engineer Intern

Biztech Consulting & Solutions

Aug 2022 – Oct 2023

Ahmedabad, India

- Built a document-upload pricing system with the team, integrating a React frontend with REST APIs that computed per-document pricing from extracted content.
- Designed a centralized Redux store to manage upload and pricing state, eliminating prop-drilling and inconsistent UI updates that had caused incorrect price displays.
- Diagnosed and resolved API integration failures by adding request validation and error handling, reducing failed upload submissions by 35%; authored 1,000+ lines of reviewed code merged into main in an Agile team.

PROJECTS

SyncMind AI - Multi-Agent Workspace | React, Node.js, Gemini API, RAG, Google Cloud

2026

- Built a real-time AI collaboration workspace for the Google Cloud Rapid Agent Hackathon (Devpost), orchestrating 4 LLM agents (Research, Planner, Summarizer, Code Review) with the Gemini API.
- Integrated RAG for context-grounded agent responses, streamed agent output live to collaborators via Socket.IO and MongoDB, and deployed on Google Cloud.

NASA Fitness & Space Center Telehealth Platform | .NET 10, EF Core, React 19, PostgreSQL

- Translated stakeholder requirements into specs and migrated a 7-year-old .NET Web Forms monolith to a .NET 10 / EF Core Web API (48 domain entities, 22 REST controllers) with a React 19 + Vite frontend.
- Engineered a dual-transport fax pipeline (RingCentral REST API + SMTP) with a QuestPDF generator producing HIPAA-compliant physician clearance forms, TLS delivery, and a DB-level audit trail.
- Hardened JWT authentication with BCrypt-hashed credentials and role-based access across 4 tiers, enforcing granular permission claims via [Authorize] attributes and service-layer ownership checks.

Realtime Chat Application | React, Node.js, Socket.IO, MongoDB, JWT

- Engineered real-time 1:1 messaging and live presence with Socket.IO, secured with JWT in httpOnly cookies and bcryptjs hashing; deployed on Render with GitHub auto-deploy.

RESEARCH & PUBLICATIONS

Artificial Intelligence Investment as a Strategic Signal: Implications for Stakeholder Confidence

2026

- Published in IJESRT, Vol. 15(4), pp. 32–46 (DOI: 10.64149/ijesrt.15.4.32-46); qualitative thematic analysis of 12 stakeholders modeling AI investment as a strategic signal.
